(FOR ADDRESS ONLY.)

Greenfinch or Green Linnet (*Ligurinus chloris*).
A bird of the Finch family common in Britain. It builds
a nest of fibres, moss, hair, etc., loosely constructed and
lays from four to six greenish-white eggs with brown or grey
spots, two broods often being reared in one season. The
Poppy (*Papaver rhoeas*) is a plant common in the English
cornfields. It has a small medicinal worth, but is more
valued for the rich colour of the blossom.

Easter Greetings
from Alfred.
